# pressure

# Model DPC-500

# Documenting Pressure Calibrator

### **Pressure ranges**

0 to 1,000 bar / 14,500 psi Also vacuum and absolute ranges

#### High accuracy

±0.025% F.S. for all pressure ranges

#### Ideal for on-site use

Calibration procedures may be pre-defined and used for calibrations on-site

# Measuring

Measure pressure, voltage and current, and supplies 24VDC as source for transmitters

#### **Pressure units**

15 different pressure units available, one additional pressure unit can be defined

# Selectable language user-interface

Choose between English, German, Italian, French and Spanish user-interface

# Easy pressure switch test

Automatically records opening and closing point values on the display

#### **External Reference sensors**

5 different reference sensors of different pressure ranges used with the same DPC-500 calibrator

#### **Documentation made easy**

RS232 communication, USB interface and JOFRACAL calibration software makes documentation easy

#### PRODUCT DESCRIPTION

The DPC-500 is a very user-friendly, accurate and compact solution for pressure comparison calibrations. The electronic pressure calibrator DPC-500 is used for high precision calibration of pressure instruments, e.g. pressure gauges, pressure transmitter, digital manometer, pressure switches, overpressure protection valves, etc.

#### **Features**

The JOFRA DPC-500 documenting pressure calibrator measures pressure, voltage and current and supplies 24 VDC as source for transmitters. Calibration procedures can be pre-defined and used for calibrations on site. The DPC-500 is featured with USB and RS232 interfaces and is powered by a Lithium-Ion battery (rechargeable without memory-effect).

The built-in reference sensor is changeable, whereby several pressure ranges can be covered with one DPC-500 unit. All standard pressure ranges between vacuum and 1000 bar (0-14,500 psi) are available as well as vacuum and absolute pressure ranges.

In "measuring" operation, the DPC-500 displays simultaneous:

- reference pressure
- output of unit under test
- deviation (in selected pressure unit)
- deviation (in % of full scale or of reading of unit under test)

This means, that it is very easy to check if the unit under test is within it's specified accuracy class.

# **Display**

Large illuminated display, lithium-ion battery powered. Icons show current status and mode, and the smaller digits show device-under-test conditions

#### Setup - menu

Set-up menu for choosing measuring, calibration or switch-test operation mode. Selectable userinterface in 5 different languages

#### Switch test

Perform semi-automatic pressure switch tests. Check and adjust switch point of pressure switches. Hysteresis is calculated and displayed in the screen

#### **Calibration**

Pre-define calibration procedures and work with them. Upload calibration data to PC using JOFRACAL calibration software

#### **Pressure connections**

Pressure ranges 0 bar to 1000 bar (4 psi to 14,500 psi), vacuum and absolute ranges

DPC-500 measure pressure and calibrate without documentation

# **JOFRACAL CALIBRATION SOFTWARE**

JOFRACAL calibration software ensures easy calibration of RTD's, thermocouples, transmitters, thermoswithes, pressure gauges and pressure switches. JOFRACAL can be used with JOFRA DPC-500, APC, CPC and IPI pressure calibrators, all JOFRA temperature calibrators, as well as JOFRA AMC910, ASC300 multi signal calibrator and ASM-800 signal multi scanner. When used with JOFRA ASM-800 signal multi scanner, JOFRACAL can perform a simultaneous semi automatic calibration on up to 24 pressure and/or temperature devices under test in any combination.

JOFRACAL software controls the complete calibration procedure, stores the results and provides a calibration audit trail through hard-copy certificates. All calibration data are stored for each sensor to monitor drift and optimise recalibration intervals. A scheduler feature allows planning of future calibrations.

Using JOFRACAL together with the JOFRA DPC-500 makes it possible to transer calibration data to and from the documenting pressure calibrator using it for offline calibration. Work orders created in JOFRACAL can be downloaded to the DPC-500, and results produced on the DPC-500, either from JOFRACAL work orders or from the DPC-500 itself, can be imported back into JOFRACAL and produced as a certificate.

Please find more information about JOFRACAL calibration software in specification sheet SS-CP-2510, which may be found at www.jofra.com

#### **REQUIREMENTS JOFRACAL**

#### Minimum hardware requirements:

- Intel® Pentium® II 1.4 GHz processor.
- 64MB RAM (128MB recommended)
- 80MB free disk space on hard disk (120MB recommended) prior to installation
- Standard VGA (800x600, 256 colours). 1024x768 recommended.
- CD-ROM drive for installation of program
- 1 or 2 free RS-232 serial ports, depending on configuration

# Minimum software equirements:

- Microsoft Windows® 98,Microsoft Windows® NT 4.0, Microsoft Windows® 2000, Microsoft Windows® ME, Microsoft Windows® XP, Vista.
- · System fonts: MS Sans Serif and Arial

Power supply 24 VDC for pressure transmitters (to be activated via menu)

Connection cable for DPC-J reference sensors Measuring Input (Sockets (Sockets 4 mm female)

Voltage

Current and Switch-test

Socket for battery charger (charging starts automatically when charger is connected

USB and RS232 interface for communication with a PC

# **FUNCTIONAL SPECIFICATIONS**

# Pressure range

The DPC-500 do all it's reference measurements via the DPC-J reference sensors. It is therefore always delivered with 1 user-specified DPC-J reference sensor from vacuum to 1000 bar F.S.

#### Pressure accuracy

Pressure accuracy: ..... ±0.025% FSO \*)

\*) calibrated at +23°C, incl. linearity, hysteresis and repeatability

F.S. (full scale) is the numerical value of the postive pressure range. The accuracy includes non-linearity, hysteresis, repeatability and temperature effect 0 to  $50^{\circ}$ C / 32 to  $122^{\circ}$ F.

#### **Temperature compensation**

Full temperature compensation ..... 0 to 50°C / 32 to 122°F

# Engineering units (built-in)

#### Resolution

......adjustable, max. 6 digits +prefix +decimal point

#### Input / output

Measurement voltage.	0-10 V, 0-5 V, 0-1 V
Resolution	display x 0,1 mV, accuracy ±0.5 mV
Measurement current.	0-20 mA, 4-20 mA
Resolution	display x 1 μA, accuracy ±1.6 μA
Voltage supply	24 VDC min. 20 mA, max. 50 mA
	tolerance ±1V

#### **Pressure connection**

......1/2" BSP male

# **Operation conditions**

0°C to 50°C		max. 8	30% r.h.	non-c	ond.
<b>During battery</b>	charging			. 0 to 4	ŀ5°C

#### Storage:

-20°C to 60°C ...... max. 80% r.h. non-condensing

#### **Graphic display**

Size	44.7 x 44.7 mm
Pixel	128 x 128p
Display resolution	up to 6 digits, user selectable

#### Storage capacity

...... 16 units under test, each 22 test points

# **Power supply**

#### **Communication interface**

USB	with metal protection cap
RS232	with metal protection cap
Serial	4800, 9600 or 11200 Baud, adjustable
Connectors	Binder type 464

#### **Measurement plugs**

4 mm standard plugs for .. current measurement 0/4-20 mA .......voltage measurement 0-1/5/10 V, pressure switch Voltage supply .......24 V / 50 mA

#### **Instrument dimensions**

Calibrator W x H x D	12.5 x 21 x 8 cm
Weight	appr. 1.1 kg

#### **ACCESSORIES**

# Complete aluminium carrying case

The DPC-500 is available as an calibrator or in one of 6 test-ready systems that are complete and equipped to meet all pressure calibration needs.

The complete ready-to-use system is delivered in a practical aluminium carrying case with space for the DPC-500, up to 5 reference sensors, set of cables, battery charger, pump, fittings etc.

# **DPC-J REFERENCE SENSORS**

The JOFRA DPC-J series are high precision reference sensors with accuracies to  $\pm$  0,025% FS (0 to 50 °C including non-linearity, hystereses and repeatability). The DPC-J reference sensors are compatible with the DPC-500 calibrator. The units are available in a series of ranges, units, and pressure references, from vacuum to absolute pressure, offering a lot of opportunities to the need of any pressure calibration.

The reference sensors are engineered for in-plant, field, or laboratory use. They are ready-to-use with the DPC-500 pressure calibrator as the protocol allows for immediate recognition and use of the module once it is plugged into the calibrator. Digital signal compensation and build in microprocessor ensures minimal drift over time in the temperature range from 0 to 50  $^{\circ}\text{C}.$ 

Up to 5 DPC-J sensors can be allocated to each JOFRA DPC-500. When combined with the DPC-500 calibrator and pump systems these reference sensors make for a powerful arsenal of calibration tools.

# **DPC-J STANDARD DELIVERY**

# **DPC-500 System A**

- 0 to 2 bar (0 to 30 psi)
- 0 to 21 bar (0 to 300 psi)
- Vacuum to 0 bar (0 psi)

This system includes the JOFRA DPC-500 calibrator together with one of the following pneumatic hand pumps: T-960 and T-970, depending on the chosen pressure range. System A is an easy-to-use

single hand operated calibration system. No need for a flat surface to operate the system - just hold it in your hand.

The System A comes in an aluminium carrying case with cutouts for fittings, hose, and the complete assembled calibration unit - no time is required to assemble the unit every time you need it. The calibrator can at any time be used separately for other pressure test tasks.

A special quick connector between the pump and the calibrator makes it possible to seperate the system in seconds and to swivel the calibrator for easy viewing.

# T-960 and T-970 pumps for system A

Model T-960 pneumatic pressure pump features an extended range vernier adjustment for precisely controlling pump pressure and comfortable pistol grip handle.

Model T-970 pneumatic pressure pump is similar to the T-960, but generate pressure up to 40 bar (580 psi).

JOFRA DPC-500 calibrator in pressure System A with pneumatic pressure handpump, with optional primary reference sensor 0 to 1,6 bar and one additional reference sensors both with traceable calibration certificate.

# **DPC-500 System B**

Vacuum to 35 bar (500 psi)

This system includes the dual function pneumatic hand pump. With this pump you can calibrate both vacuum and pressure applications. It takes just a few seconds to switch between vacuum and pressure, just push one button (valve) on the T-975 hand-pump.

The System B comes in an aluminium carrying case with cutouts for fittings, hose and the complete assembled calibration unit - no time required to assemble the unit every time.

The calibrator and the pump are fitted with a special quick connector that makes it possible to separate the system in seconds without any tool. This quick connector also makes it possible to use the assembled system with the calibrator twisted to any angle.

# T-975 hand pump for system B

Model T-975 pneumatic pressure pump features both vacuum and pressure generation. A button (valve) makes it easy to switch from vacuum to pressure measurements. Built-in release valve, vernier valve for fine adjustment and dual pressure output enable safe and simple operation. The unit offers both metric and imperial threads on the reference connection and the hose.

# **DPC-500 System C**

- 0 to 200 bar (3,000 psi)
- 0 to 350 bar (5,000 psi)

This system consists of an DPC-500 calibrator together with a hydraulic, high pressure hand pump T-620 or T-620H, which features an oil reservoir to prime the system.

System C is an easy-to-use single hand-operated calibration system. No need for a flat surface (table) to operate the system. The system includes release valve and vernier valve for fine adjustment to enable safe and simple operation of the pump.

The System C comes in an aluminium carrying case with cutouts for fittings, hose, and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

# Included with System C delivery

JOFRA DPC-500 calibrator in pressure System C with hydraulic pressure handpump with optional primary reference sensor 0 to 160 bar and one additional reference sensors both with traceable calibration certificate.

# **DPC-500 System D**

0 to 350 bar (5,000 psi)

This system consists of an DPC-500 calibrator with a rugged, hydraulic, high pressure screw pump.

System D is an easy-to-use calibration system. Place the pump on a flat surface and turn the handle to generate pressure. You can adjust the calibrator to fit the best viewing angle. The system includes a manifold for connection of the test device, a fine adjustment vernier valve (optional), and a reservoir for extra oil or water (optional).

The System D comes in an aluminium carrying case with cutouts for fittings and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

# **AMETEK** screwpump

The 65-P016 and 65-P017 screwpumps are designed for very easy generation of high pressure. The screwpumps has a 4 connection manifold. Fine adjustment, vernier valve, liquid reservoir, and fittings are optional. The AMETEK screwpump may be delivered for 2 different test media: hydraulic oil or water.

# Part No. Description

65-P016 Screw pump oil: 0 to 350 bar (5000 psi) 1) 65-P017 Screw pump water: 0 to 350 bar (5000 psi) 1)

1) 25 ml (0.85 oz) reservoir

# Included with System D delivery

- Standard delivery (see page 12)
- Screwpump 65-P016 for hydraulic oil or 65-P017 for water
- 1 roll of Teflon tape
- 10 bonded seals
- 6 mm Allen key
- Protective carrying case

#### **Accessories**

Part No.	Description
60P013	Vernier valve fine adjustment for 65-P016/017
60P016	Packing set for screw pump oil part no. 65-P016
60P017	Packing set for screw pump water part no. 65-P017
65-R975	Reservoir set with seals, valve and bonded seal
60R135	Valve for oil reservoir
65P175	1 m. Pressure hose, (Max. 350 bar / 5,000 psi) *
65P180	2 m. Pressure hose, (Max. 350 bar / 5,000 psi) *
601156	1.5 m. Pressure hose, (Max. 700 bar/10,000 psi) *
601157	5 m., Pressure hose, (Max. 700 bar / 10,000 psi) *
65N000	Extension tube, 120 mm (Max. 350 bar / 5.000 psi) *
	* 1/4" BSP female to 1/4" BSP male
126086	Cable for RS232, DPC-500
126087	Cable for USB, DPC-500
126100	Set of 5 pcs of O-rings for DPCJ sensor
126069	Connecting cable 2 meters for DPCJ and DPC-500
50-REP 6	
	to 1/4" BSP

# **Ordering information System D**

_	S) N	X One	<u> </u>	<b>Total number of reference sensors</b> S1/S2/S3/S4/S5 (S2 = Two sensors) Pump system only (no calibrator)
	DOX DWX			<b>System</b> DPC-500 System D (pump 65-P016) DPC-500 System D (pump 65-P017)
			xxxx	Primary reference sensor to be mounted on the system at delivery Last four digits of DPC-J reference sensor part number found at page 5 (additional reference sensors should be stated separately at the order)
			F	Certificate Traceable calibration certificate (std) Accredited calibration certificate

# DPCS2DOXG364F Sample order number

JOFRA DPC-500 calibrator in pressure System D with hydraulic oil screwpump with optional primary reference sensor 0 to 250 bar and one additional reference sensors both with traceable calibration certificate.

# **DPC-500 System E**

0 to 700 bar (10,000 psi)

This system consists of an DPC-500 calibrator together with a rugged, hydraulic, high pressure pump.

System E is an easy-touse calibration system. The hydraulic pump makes it very

The System E comes in an aluminium carrying case with cutouts for fittings and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

# Included with System E delivery

- Standard delivery (see page 12)
- Hydraulic pump 65-P014 for hydraulic oil
- 1 roll of Teflon tape
- 10 bonded seals
- 6 mm Allen key
- Protective carrying case
- Vernier valve for fine adjustment

#### **Accessories**

Part No.	Description
60P013	Vernier valve for fine adjustment
60P014	Packing set for Jack pump part no. 65-P014
60I156	1.5 m. Pressure hose, (Max. 700 bar/10,000 psi)*
60I157	5 m., Pressure hose, (Max. 700 bar / 10,000 psi) *
	* 1/4" BSP female to 1/4" BSP male
126086	Cable for RS232, DPC-500
126087	Cable for USB, DPC-500
126100	Set of 5 pcs of O-rings for DPCJ sensor
126069	Connecting cable 2 meters for DPCJ and DPC-500
50-REP 6	15 Quick connector set, female 1/4"BSP

#### AMETEK high pressure hydraulic oil pump

The 65-P014 hydraulic pump is designed for high pressure applications. The pump has a 4 connection output manifold. Fine adjustment vernier valve and fittings are optional.

Pressure range	0 to 700 bar / 10,000 psi
Type	Hydraulic
Test media	Oil
Operation	Jack pump
"O"-rings	Buna-N
Wetted parts	Aluminum, brass, stainless steel
Connections to te	est objects 4 x 1/4" BSP female
Size	36.5 x 20.0 x 14.2 cm / 14.4 x 7.9 x 5,6 in
Weight	5.3 kg / 11.6 lbs

#### DPCS2EXXG372F Sample order number

JOFRA DPC-500 calibrator in pressure System E with high pressure pump for hydraulic oil with optional primary reference sensor 0 to 600 bar and one additional reference sensors both with traceable calibration certificate.

# **DPC-500 System F**

0 to 1,000 bar (14,500 psi)

System F is an easy-touse calibration system. The hydraulic pump makes it very easy to prime the system. The pump contains 75 in 3 / 1.23 l of liquid.

The system includes a manifold for connection of two test devices and the fine adjustment vernier valve is standard. The System F comes in a aluminium carrying case with cutouts for fittings. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

#### **AMETEK Type T hydraulic oil or water pump**

The type T pump is designed for high pressure applications up to 15,000 psi (1,000 bar).

The pump and system may be ordered with either oil or a water/alcohol mixture as the pressure medium. The pump is constructed of 300 series stainless steel and Monel allowing for the use of other hydraulic media. There are three available seal packages for the system: Buna-N, Viton®, and EPT. 1)

The Type T pump features a dual pressure output manifold, fine adjustment vernier valve, relief valve, and dual volume control for rapid pressure increase at lower pressures and easier pumping at higher pressures.

Pressure range	0 to 1,000 bar / 15,000 psi

#### Ordoring

Description	Seals
0 to 1,000 bar (15,000 psi) water	
0 to 1,000 bar (15,000 psi) water	- EPT 4)
0 to 1,000 bar (15,000 psi) oil	- Buna N <sup>2)</sup>
0 to 1,000 bar (15,000 psi) oil	- Viton <sup>3)</sup>
0 to 1,000 bar (15,000 psi) oil	- EPT <sup>4)</sup>
	0 to 1,000 bar (15,000 psi) water 0 to 1,000 bar (15,000 psi) water 0 to 1,000 bar (15,000 psi) water 0 to 1,000 bar (15,000 psi) oil 0 to 1,000 bar (15,000 psi) oil

- 1) Customer must verify compatibility of seals and pump materials with pressure medium. Viton is a registered trademark.
- 2) Buna N are the standard "O" ring material for the hydraulic testers. They are used with water/alcohol or non corrosive oils.
- 3) Viton "O" ring material is used for all corrosive oils other than Skydrol.
- 4) EPT "O" ring material is specifically for Skydrol Oil used for hydraulic systems in airplanes, it is very corrosive.

# Included with System F delivery

- Standard delivery (see page 12)
- Type T Hydraulic pump
- Allen key 6 mm
- 1 roll of teflon tape
- Protective carrying case

JOFRA DPC-500 with standard accessories, optional primary reference sensor -1 to 39 bar and one additional reference sensor 0 to 16 bar both with traceable calibration certificate.

#### STANDARD DELIVERY

- DPC-500 calibrator
- Traceable calibration certificate
- User manual
- Battery charger
- · Test leads: red and black
- Connection cable for RS232
- JOFRACAL calibration software
- DPC-CAL Windows software
- 1 x DPC-J reference sensor (user specified)

#### **AMETEK Calibration Instruments**

is one of the world's leading manufacturers and developers of calibration instruments for temperature, pressure and process signals as well as for temperature sensors both from a commercial and a technological point of view.

#### **JOFRA Temperature Instruments**

Portable precision thermometers. Dry-block and liquid bath calibrators: 4 series, with more than 25 models and temperature ranges from -90° to 1205°C / -130° to 2200°F. All featuring speed, portability, accuracy and advanced documenting functions with JOFRACAL calibration software.

#### **JOFRA Pressure Instruments**

Convenient electronic systems ranging from
-1 to 1000 bar (25 inHg to 14,500 psi) multiple choices of pressure ranges, pumps and
accuracies, fully temperature-compensated
for problem-free and accurate field use.

#### **JOFRA Signal Instruments**

Process signal measurement and simulation for easy control loop calibration and measurement tasks - from handheld field instruments to laboratory reference level bench top instruments.

#### **JOFRA / JF Marine Instruments**

A complete range of calibration equipment for temperature, pressure and signal, approved for marine use.

#### **FP Temperature Sensors**

A complete range of temperature sensors for industrial and marine use.

#### **M&G Pressure Testers**

Pneumatic floating-ball or hydraulic piston dead weight testers with accuracies to 0.015% of reading.

# M&G Pumps

Pressure generators from small pneumatic "bicycle" style pumps to hydraulic pumps generating up to 1,000 bar (15,000 psi).

...because calibration is a matter of confidence
