

## Data Sheet

### High Voltage Test Set PGK 110 / 5 HB

The two-part test sets PGK HB generate variable AC test voltages of mains frequency or DC voltages of positive or negative polarity.

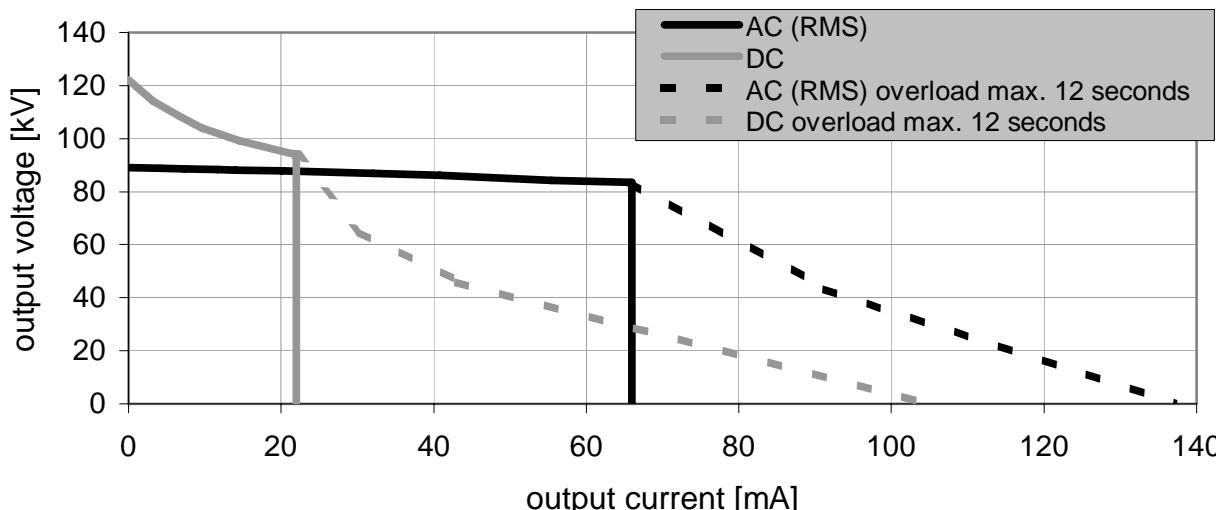

The operating unit in 19" design has a voltage and current display, safety control elements according to VDE 0104 and a variable transformer for voltage adjustment.

The high voltage unit contains an oil insulated high voltage transformer and, depending on the desired operation mode, a rectifier rod or a resistor rod. The polarity of the DC test voltage can be changed by reversing the rectifier in the high voltage unit.

#### Features:

- absolutely maintenance-free design
- stepless adjustable output voltage
- safety control according to VDE 0104
- short-circuit protected by internal current limitation
- voltage indication: 2 range analogue meter, ratio 1:3
- current measurement: 3 range analogue meter, decadic
- thermal overcurrent switch-off
